6 August 1963

MEMORANDUM FOR: Assistant Director, OSA

SUBJECT : Project OXCART - Awareness in Industry
(Investigation of [redacted]
[redacted] Incident)

25X1A

25X1A 1. Attention is invited to the attached report prepared by [redacted] OSI officer assigned to this Staff.

25X1A 2. The conclusion reached as a result of the inquiries made is that [redacted], Convair General Dynamics representative at [redacted] did not benefit from leaks of information in preparing his report on the use of titanium by Lockheed. Rather, it appears that his report was a summary of known factors concerning Kelly Johnson and Lockheed, blended with educated speculation and some "puffing".

25X1A 3. It is the opinion of the writer that in all probability [redacted] was not completely candid in his testimony and the possibility does exist that he picked up some information from sources not identified by him to the OSI officer conducting the inquiry. It is felt, however, that [redacted] probably learned his lesson in this instance and will not engage in such an exercise in the immediate future.

25X1A 4. It is believed that the information contained in the attached report is of value in that it provides a picture from the point of view of an industry representative looking at our special project from the outside and invites our attention to areas wherein our techniques can be improved.

25X1A 5. This Staff will conduct certain additional inquiries in regard to this matter and will continue to periodically monitor the activities of [redacted].
